PROJECTS

Cleango
- The CLEANGO website highlights professional upholstery cleaning services, promoting high-quality cleaning as a sustainable and cost-effective alternative to furniture replacement. Built using HTML, Tailwind CSS, and Next.js.
- Developed two separate portals: one for administrators and one for users.
- Design a simple and easy-to-use interface.
- Created a design that works well on mobile devices.
- **Used Technologies:** HTML/CSS, Tailwind CSS, Next.JS.

Spanish fork river management
- A project for managing Spain's canals and sub-canals, including their flow and daily reporting.
- My role was to create the project from scratch, develop the entire UI, and work on API integration for some modules, focusing on delivering the best user experience solution.
- "**Next.js**, **TypeScript**, **Tailwind CSS**, **Shadcn**, **yup validation**, and **Zustand** were the technologies used in the project."

Cypherplus
- The project revolves around managing user account details and investment, with my primary involvement being in the design aspect. Additionally, I contributed to developing functionalities like state handling for design within the project.
- Design a require module pages.
- Ensure that the design functions correctly and is fully responsive on mobile devices.
- **Used Technologies**: HTML/CSS, SCSS and Vue.js.

Yaalago
- YaalaGo is a simple tool that helps travel agencies manage their work easily. You can handle bookings, organize tasks, and save time all in one place.
- Designed various module pages and updated existing pages to ensure responsiveness.
- **Used Technologies:** HTML/CSS, Tailwind CSS, SCSS and Laravel-UI Development.

TNGNET (The Next Generation Network)
- TNGNET (The Next Generation Network) was a server buyer project developed using Html, Tailwind CSS and jQuery.
- Created two portals: one for the Admin side and one for the User side.
- Designed a compact and user-friendly interface.
- Ensured cross-browser compatibility.
- **Used Technologies:** HTML/CSS, Tailwind CSS, jQuery and Data Tables.
